

BATES DPS[®] DRIED PARTS STABILIZER

CASE STUDY#2: STAIR TREADS

RIETHMILLER LUMBER

New Wilmington, PA USA

- Stair Tread Production

SPECIES USED:

Hard Maple Soft Maple
 White Oak Red Oak
 Poplar Ash Beech
 Walnut Birch Hickory
 Brazilian Cherry or Jotaba

BENEFITS REPORTED:

- Protects wood inventory investment
- Increases yield
- Reduces call-backs
- Enables time & resource management

#2 Edge-glued, solid hardwood panels are created for stair tread production. Ends are sprayed with DPS, to prevent checking and to reduce glue joint failure.
